Modo de Jogar

Os jogadores posicionam seus peões no **INÍCIO** da trilha, em uma ordem pré-estabelecida. O primeiro jogador lança o dado, anda o número de casas indicada pelo dado e retira uma carta do monte. O jogador deverá mostrar a carta aos outros jogadores e resolver corretamente o problema proposto. Se acertar, permanece na casa e se errar, volta para casa onde estava antes de jogar o dado. Vence o jogador que chegar primeiro no **FIM** da trilha.
